STANDARDS

Presented by :-

Ms. Jalpa Rajyaguru and Ms. Neha Trivedi

INTRODUCTION

- A set of agreed upon and documented guidelines, specifications, accepted practices, technical requirements, stated SOP and set benchmarks for diverse fields.
- In education, the concept of standards includes both the description of what is to be learned and taught (the curriculum) and the results of assessment.
- These standards cover various aspects of school functioning including teaching and learning, infrastructure, governance, leadership, student development, community engagement, assessment and evaluation, Inclusivity and more.

Academic standards- WHY?

DYNAMIC SYSTEM

The education system is changing constantly because of new technologies and innovative learning methods

CONSISTENCY

The standards are critical to maintaining a consistent, rigorous approach to teaching and learning.

EVALUATION

Evaluate our progress(how far or how close we are towards our goal)

ACTIONS

To take necessary actions to achieve your standards.

SMART

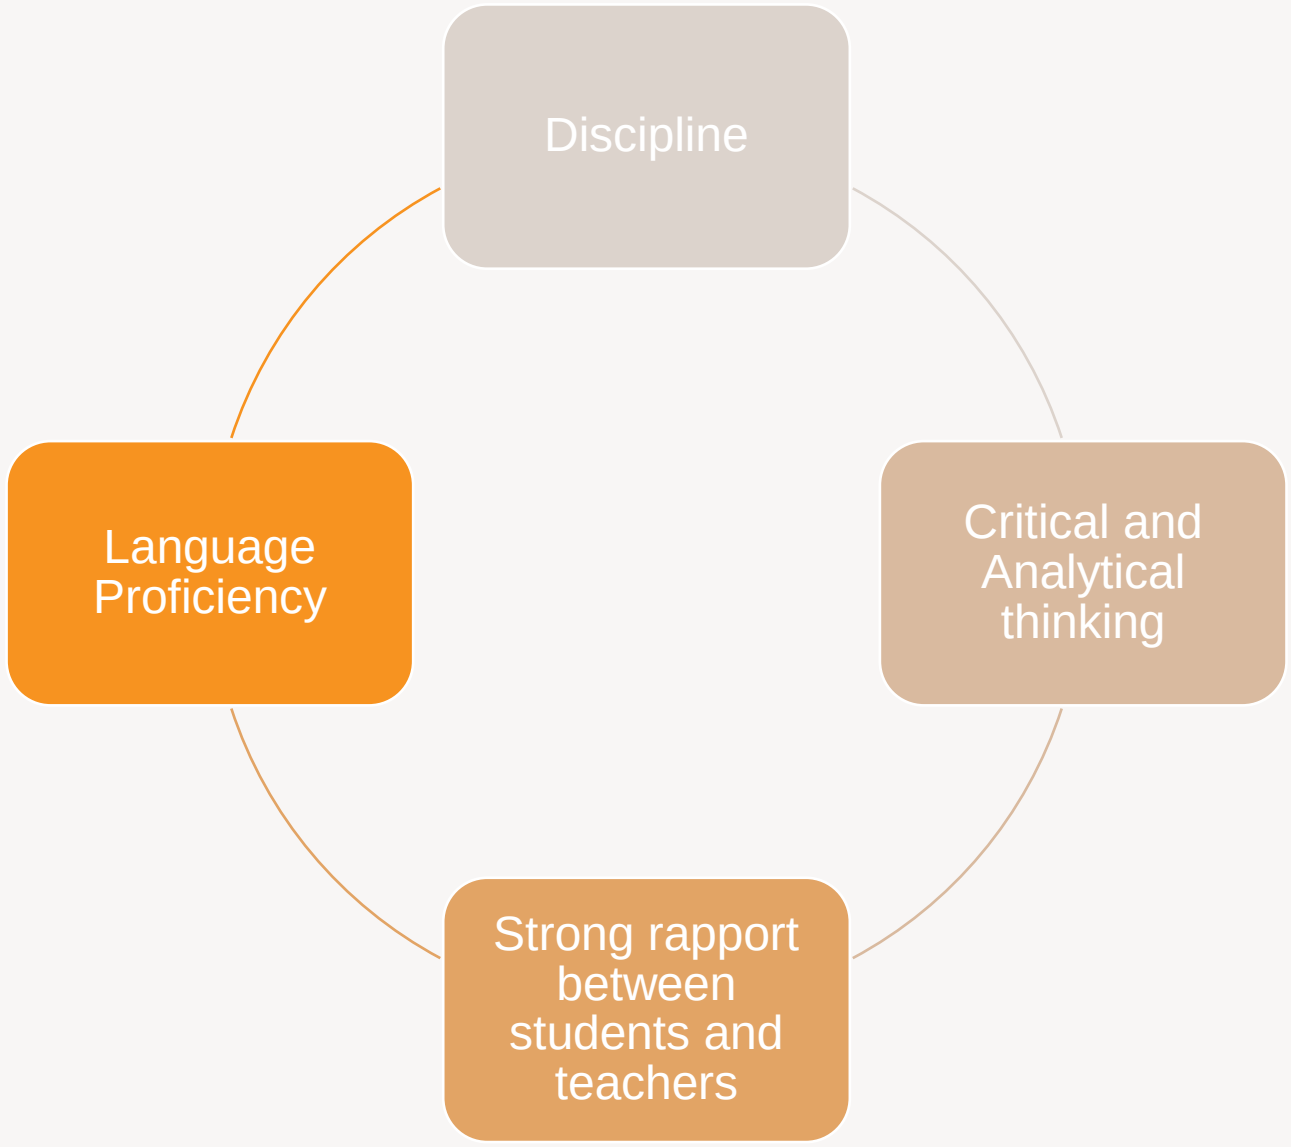

Specific, Measurable, Achievable, Realistic Timely

STANDARDS ACHIEIVED

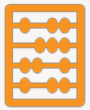

- Academic excellence
- Green School
- Participation in national and International competitions
- Technology Integration- STEMS AND ROBOTICS
- Holistic development of a child
- State of art infrastructure
- Cultural and ethical values

MILESTONES WE WISH TO ACHIEVE

WAYS OF IMPROVING STANDARDS IN EDUCATION

- Social and emotional learning e.g.. Gratitude journals, community involvement – visits to orphanage or tie up with old age home
- Encourage teamwork and group activities.(Buddy interaction, Cooperative learning)

- Professional development of Teachers
- Child Psychology related workshops for teachers
- Student centered learning.(in form of IEP, clearing previous doubts)
- Organize seminars and talks on topics like less use of screen time, proper nutrition, importance of physical activity

- Importance of inter-connecting concepts across different subjects.
- Motivate students to self-study and ask them to create their own question bank.
- Uniformity in notebooks

CONCLUSION

Improving the standards is necessary but it can’t be done within a day or two, it’s a gradual process that happens over the time.

Perhaps ,the school and teachers can take the right steps and implement some of the practices for the progress of everyone.

- Suggestions from everyone are always most welcome.

Thank you !
